Augmenting The Medical Infrastructure With
Healthcare App Development Services !!!

There's A Reason **Healthcare App Development Is On The Rise.**

The rising popularity of **healthcare mobile application development** is a trend you can take advantage of. If you have an idea for a new medical app, you'll of course need help from expert healthcare app developers to turn your vision into a reality.

Qualified and dedicated mHealth app development specialists are exactly what you'll find at **The Gemini India.** Serving clients throughout the India & Abroad, we're the ideal healthcare application development company for your needs. **Keep reading to learn why!**

Get Your **Healthcare Applications** Developed With A Tap

We develop healthcare apps that help overcome the gap between the patients and the doctors and establish a **seamless transition.** It lays down a smooth path to get **advanced care** and **better outcomes.**

From **lowered operation costs** to **enhanced patient engagement**, we have a lot of things to offer. We are a world-changing healthcare app development company that makes use of **cutting-edge technology** to provide a simplified solution. Plus, we are fully equipped to take your healthcare projects to the sky with.

Why **The Gemini India** is The Right Choice As Healthcare Mobility Solution?

Our healthcare app development services are tailored to **improve patient care, automate patient scheduling, modernize patient examination, and minimize routine clinic visits** by integrating state-of-the-art eHealth solutions and providing dedicated, easy-to-use patient care software.

- Out-of-the-box And Creative Thinking
- Experience Experts Take On Your Project
- On-Time Delivery
- Guaranteed Success
- Round-the-clock technical support

What Is The **Need** For Healthcare App Development?

01
On-demand and real-time medical care

02
Provide a direct connection between the stakeholders

03
Increased Time and Cost efficiency
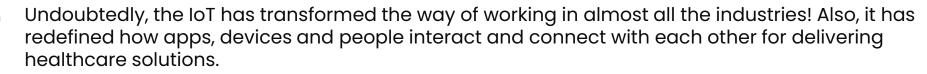

04
Improve Decision Making & increase productivity

05
Provide round o clock assistance

Advantages Of The Adopting Healthcare App Solutions

Undoubtedly, the IoT has transformed the way of working in almost all the industries! Also, it has redefined how apps, devices and people interact and connect with each other for delivering healthcare solutions.

- Advanced treatment and **accurate diagnosis** in a short term than ever.
- **Improvised engagement** between doctors & patient to make sure the optimized recovery.
- **Real-time support** within the hospitals to reduce the errors and perfection can be attained.
- Constant patient care to have active involvement for **real-time monitoring** of the disease.
- **Reduced costs** of treatment with the enhanced perfection.
- **Improved management of the disease** with the continuous monitoring during the treatment.
- **Advanced experience** to the patients with the connectivity through the devices & proactive treatment.

Benefits Of Embracing Mobility Solutions To Healthcare Industry

What Patients Gain?

- Preventive Care
- Lower Insurance Cost
- Cheaper Health Monitoring
- Remote Healthcare
- Appointment Scheduling
- Share Medical Records
- Patient Portals
- Pre-diagnosis

What Is There For Healthcare Providers?

- Seamless data flow
- Direct patient management
- Enhance physicians' efficiency
- Increases diagnostic accuracy
- Point-of-care co-ordination
- Convenience and accessibility
- Real-time communication
- Passive Care

Top Benefits Of Our Healthcare App

FOR PATIENTS

- Easy appointment scheduling
- Video conferencing with physician
- Easy & safe uploading of medical reports & other documentation
- Detailed doctor information including experience, expertise, etc.
- Secure online payment options

FOR DOCTORS

- Accept/Reject an appointment at ease.
- Real time communication with patients.
- Prescribe medication digitally during consultations
- View patients details including medical history, records etc.
- Set time slots of their availability depending on schedule

Healthcare
App Features

Top Features in Our Patient App

EHR/EMR Integration

Patient records, the core of any health software, guarantee smooth patient journeys across the care continuum.

Video Conferencing

Video calls create an efficient communication channel between patients, providers, and other parties.

E-Prescriptions

Electronic medical prescriptions solve a lot of headaches for everyone involved: doctors, pharmacies, and patients.

Payments

An option for digital payments is practically a must in modern health software and should include subscriptions.

Notifications

Notifications and reminders improve user engagement and allow customers to take appropriate actions on time. A must-have feature for any healthtech app, e.g., with appointment scheduling.

Reporting

Everybody loves dashboards with visual reports and analytics because they help arrive at prompt decisions faster. A typical option for a doctor app.
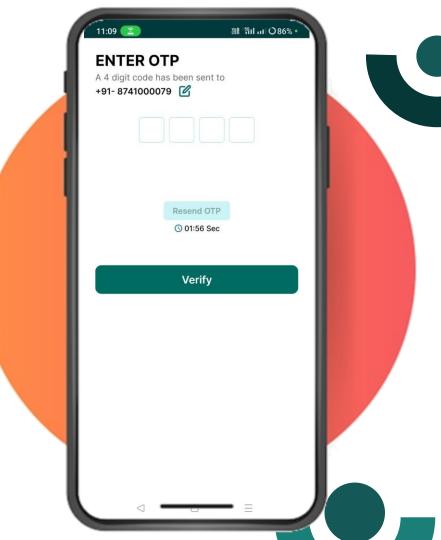

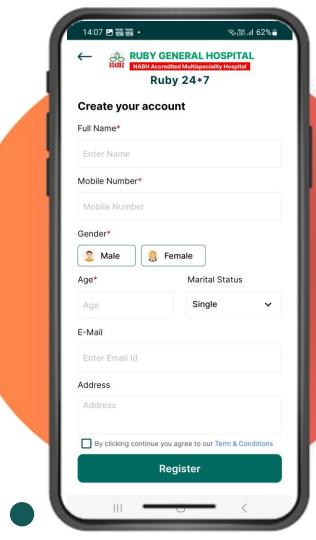

Login Window

- Easy Login with mobile number

Secure Login

- Secure login by using One-time Password authentication.
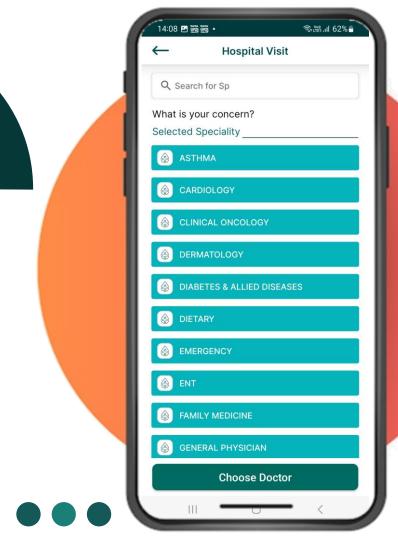

Instant Registration

- A User can be registered quickly in app using a Minimum Data Set with just Name, Mobile no, Age and Gender. This ensures reduced registration time

Home Page

- Enables patients to search for top doctors and book Online and offline appointments.
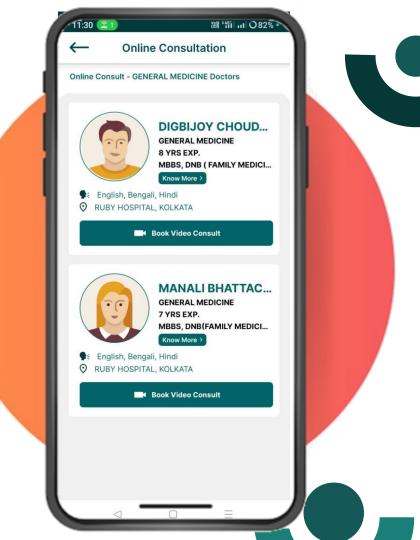

Search Doctors

- Users can search doctors for online/Offline consultation by doctor name, specialties, symptoms, and view details: specialty, degree for consultation charges, availability, etc.

Online Consultation

Users can book the video consultation appointment at a convenient time slot based on symptoms or doctor specialty and the doctors' availability.
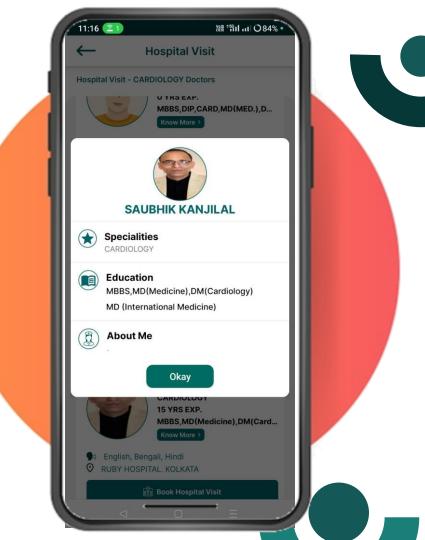

Hospital Visit Booking

In this feature, users can book a Hospital visit by selecting a doctor from the given list. Users fill in the address, patient, date, time, and symptoms and book the appointment after selecting the payment mode.

View Doctor Profile

- User can view details of doctor before booking a consultation.
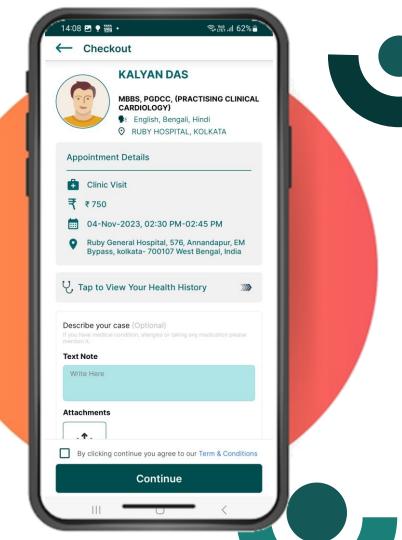

Select Time Slot/ Patient
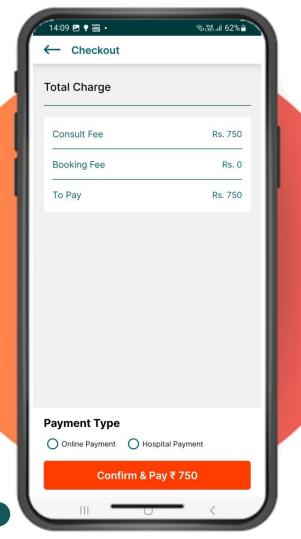

▪ User can Select a family member, available date and time slot to book a consultation.

Appointment Booking

▪ User can add their health history, notes & can upload required document for consultation before proceeding for payment.
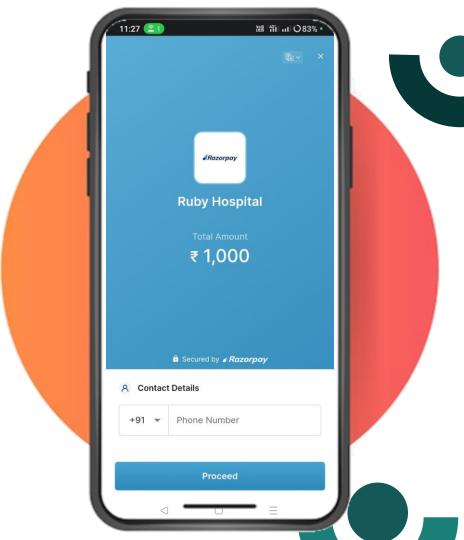

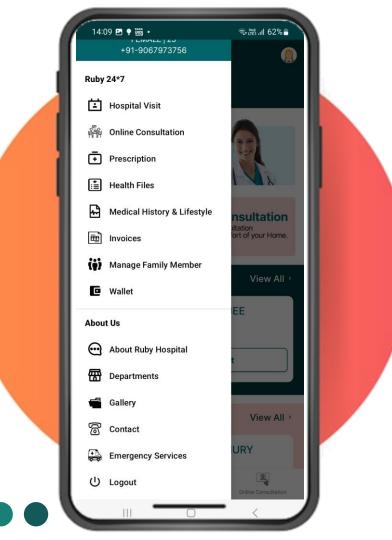

Checkout

- User can pre-pay for their consultations.

Payment Gateway

- Pay securely for consultations with multiple secured payment gateways.
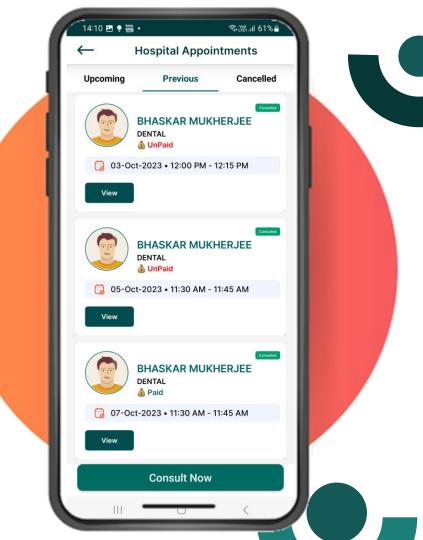

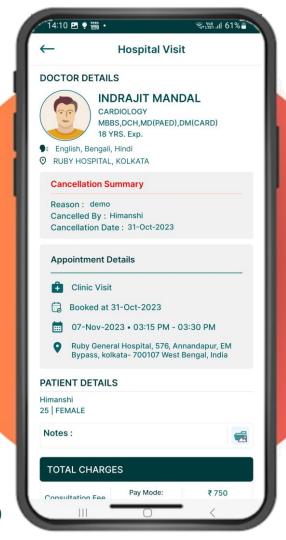

Side Bar

- User can view various modules over here to view their appointments, Health histories, payments, health files etc.

Appointment History

- Users can see their upcoming, Previous & Cancelled doctor appointment details such as doctor's name, date, time, total charges, payment status etc.
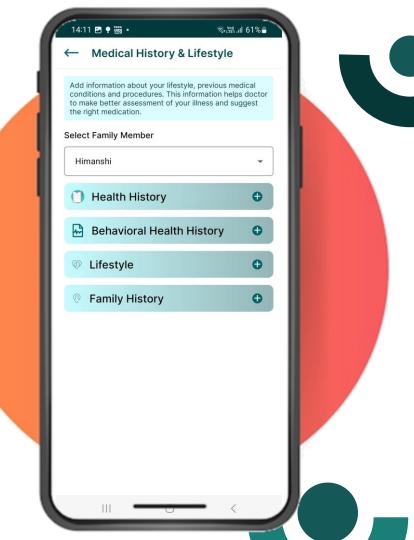

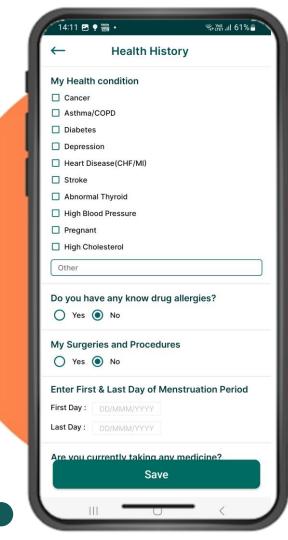

Cancellation History

- Users can cancel the appointments & view the history for the same.

Medical History

- Users can add their and their family members health history.
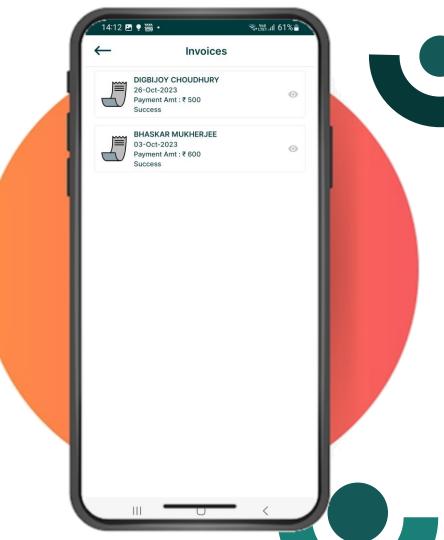

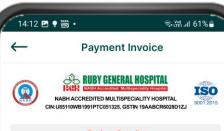

Health History

- Users can add their and their family members health history.

Invoice History

- Users can view all their past payment transaction in a list view.
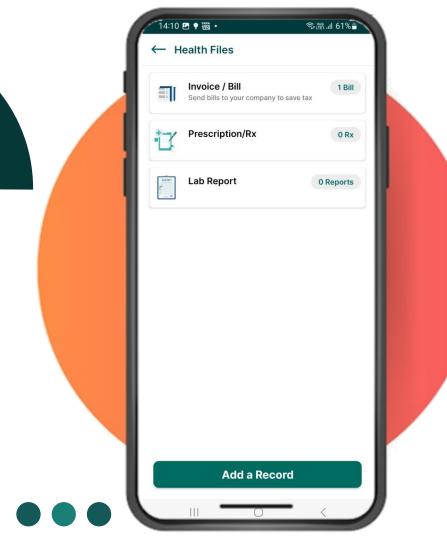

Invoice

- Users can view and download the payment invoice in PDF format.

Wallet Balance

▪ It enables user to view their transactions and available wallet balance.

Health Files

- Users can add their and their family members Medical records.

Prescription

- Users can view and download their prescriptions uploaded by doctors after consultation.

Add Family Member

- Add family members for easy consultation from a single profile

Contact Details

- Users can view the contact details of hospital in case of any emergency and query

Admin Panel

Admin Panel Features

Powerful Dashboard

Admin gets details: total appointment requests, rescheduled & canceled appointments with the total number of doctors, patients, & revenue for the selected date range in a dashboard.

Manage Services

In this feature, admin can manage the consultation services by activating or inactivating them for the users. The admin can also add and manage the cancellation charges for the services.

Admin Panel Features

Register Doctors

Admin can register new doctors by entering their contact details, qualifications, consultation charges, specialty, clinic information, and services.

View Appointments

View and manage booked and upcoming appointments, canceled appointments, and rescheduled appointments for all the doctors for a selected date.

Reports and Analytics

Admin has access to detailed reports and insights like the top-performing doctor, popular doctor categories, total app installments, etc.

Our Healthcare Mobile App
Development Process

STEP 1
Plan

- Research & analyze
- Define scope & medical app features
- Create project roadmap
- Collaborate with client

STEP 2
Develop

- Build architecture
- Implement features
- Create Backend With a Powering Technology
- Integrate Database

STEP 3
Test

- Quality analysis
- Test performance & security
- Resolving bugs
- User acceptance

STEP 4
Deploy

- Prepare for release
- Meet legal requirements
- Monitor performance
- Regularly update app
